

THE SAFEST HEATER TREATER ANODE IN THE INDUSTRY

After years of experience working with fiberglass anode heads and their limitations, **Galvotec Alloys** has developed a new design, using an integrated solid steel cap that eliminates the potential structural and safety risks of the old technology.

- Precision machined integrated steel cap
- Solid cap with no through holes
- No resins or risks of leaks
- Resistant to rough handling in the field
- Perfectly fits standard Victaulic gasket and clamp
- Cast with stabilizing ribs for 4" schedule 40 or 80 pipes
- Available in 3" and 3.5" diameters
- Connection cables bolted directly to the handle
- Proudly made in the USA
